Four sessions. The first is free.

AIR APAC Center for AI Readiness

Session 1 is free and runs inside a conference or a company event. Sessions 2 to 4 are paid half-day sessions, each an existing AIR Academy programme: Session 2 goes further into testing the evidence (the Test question), Session 3 into deciding under uncertainty (the Perform question), Session 4 into leading a team's change (the Engage question). The Structure question is covered in Session 1. Sessions 2 and 3 run for one company or as open sessions that individuals join one at a time; Session 4 runs for one company's management team.

SESSION	PROGRAMME AND WHO IT IS FOR	OUTCOME	LENGTH AND PRICE	HOW TO JOIN
1	**Checking an AI Answer Before Making a Business Decision** Managers, business owners and professionals, any sector.	Examine one AI recommendation with the four questions and write one decision you can defend.	60 minutes Free	Hosted by a conference organiser, a partner or a company. Request a date below.
2	**Critical Thinking with AI: test the claim the decision rests on** Anyone who reviews, approves or forwards work that AI helped produce.	Find the one claim a recommendation depends on, check the source rather than its wording, and tell evidence from confident language.	Half day Quoted per group; open-session price given with each date	Open session, or in-company for 15 to 30 people.
3	**Deciding Under Uncertainty with AI: what to decide now, what to postpone, and when to change course** Managers and senior leaders who must decide while conditions keep changing.	Separate what is known from what is not, decide what to commit to now and what to keep open, and name in advance what would change course.	Half-day edition (the full programme is one or two days) Quoted per group; open-session price given with each date	Open session, or in-company. The one-day and two-day editions add the full case work.
4	**Leading Teams Through AI Change: test the change, then correct it** Line managers, transformation leads and the people responsible for how a team works with AI.	Set what a team may hand to AI and what stays with people, test a change before it is rolled out, and correct it on evidence.	Half-day edition Quoted per group	In-company, for a management team that works together.

How the sessions fit together

1. For one company there is also the one-day programme, From Answers to Decisions: all four questions in one day, practised on StepSim, the AIR APAC decision simulator built by Exeter Labs. It is the recommended start for a management team. Sessions 2 to 4 are separate half days a company can add afterwards, or book on their own; none requires another first.
2. An individual joins open sessions one at a time. Dates are published on this page when set, and sent to those who asked for the next session.
3. Everyone who completes a paid session receives a Record of Completion. A separate, optional assessment can lead to AIRS-J/1 certification.
4. Prices are quoted for each group. They depend on the edition, the number of participants and the location. No price is published.

Dates, a quotation for your group, or the next open session: **hello@airapac.org**. Programme pages: airapac.org/academy/catalogue
